

STEP 4

Post Processing

Standard post-processing functionalities available online:

- › Slices
- › Streamlines
- › Contours

Downloadable solution file to be processed with Paraview (<http://www.paraview.org/>)

- › Complete scientific data manipulation
- › Ready-to-use Paraview scripts provided

PRODUCT DESCRIPTION

We provide an innovative simulation software, available on demand via Cloud. With every subscription plan, you receive both simulation credits and as many resources as needed.

Virtual simulation software is a very powerful tool, with its adoption optimization and innovation can be achieved in every field. We made this instrument accessible to everyone by developing an infrastructure that favors a super-easy adoption by any new user as well as by effectively lowering costs.

Our goal is to satisfy all your needs, giving you the most straightforward tool we can to value your time.

CONSELF wants to make state of the art, cutting edge simulation technology, accessible to every professional around the globe.

Unlimited hardware resources provided on demand

Multiple users access

Validation data sheets at wiki.conself.com

Online support 24/7

Training available on demand
